FINAL PROJECT - WEB 2
PART 2

Website page building - project "business"

1. You must build the template provided by the teacher using HTML and CSS.

2. You can use SIMILAR COLORS and SIMILAR FONT FAMILIES. Don't use very different ones from the original template. The text must be the exact same. Images can be different.

3. **PART 1**: HEADER. You must build the header following the technique explained during class 16. Put a height of 80px to the header. The navigation bar (menu) must be in the center.

4. **MAIN-BANNER**: It must have 600px of height. USE display flex to center the textbox. You can use a similar image.

5. **SECTION "ABOUT BUSINESS COMPANY"** . You must use the technique to position IMAGE and TEXT side by side. Each DIV can have 50% of width. USE ANY IMAGE on the left (background image). Use the same or similar text . Try to use very similar colors AND font family.

6. Section "small banner - case studies" - you dont need to use display flex. Just the section with the background-image, padding and the container inside the section. It is THE SAME container used on the previous section. Don't forget to text-align center here.

7. Once you finish, Send HTML and CSS on separate files directly on slack. ALSO Send the files in a ZIP folder, respect the name of the folder: **YOURNAME_FINAL-PROJECT-PART-2_WEB2**

Aspects to be evaluated:

1) Final result - Visually/Design (choice of colors, spacing, typography, etc) : _____

2) Coding (good practices) - Using the correct technique for each item : _____

3) Code Syntax and organization (Clean code) : _____

4) Submit the files correctly (naming) : _____
